

# DIGITALIZING MEDICAL PRACTICES IN CANADA

Improving outcomes through predictive medical assessment with MESI mTABLET

**JUNE 21 & 23**

## What is it?

- The event is an exclusive, official introduction of MESI mTABLET system to the Canadian market
- The attendees will have an excellent opportunity to familiarize themselves with predictive medical assessment, existing international case studies and fields of healthcare where MESI technology is improving workflows and patient outcomes
- The speakers will present the importance of digitalizing Canadian medical practices and explain various business models with the MESI mTABLET

## Who is it for?

- Medical device distributors, present in all sectors of healthcare, from assisted care to medical practices and hospitals
- Industry experts looking for clinical synergies
- Healthcare professionals looking to digitalize their practices and bring the future of healthcare into the present

## Why attend?

- Familiarize yourself with how Canadian healthcare can digitalize medical practices with predictive medical assessment
- Discover the advantages of MESI products and plenty of good practice
- Watch a variety of live diagnostic measurements
- Understand the business models that involve MESI digital solutions
